bironshaluka

SUMMARY

Motivated and detail-oriented IT undergraduate specializing in **Computer Systems & Network Engineering** with a strong passion for computer networking, network infrastructure, and emerging technologies. Skilled in **TCP/IP, IP addressing, subnetting, routing and switching, VLAN configuration, DHCP, DNS, network security, and network troubleshooting**. Hands-on experience with **Cisco Packet Tracer**, Linux environments, and enterprise network design projects. Currently pursuing the **CCNA** certification while continuously expanding my knowledge in cloud computing, cybersecurity, and IT infrastructure. Seeking a Network Engineering Internship to apply my technical skills and gain industry experience.

EDUCATION

BSc (Hons) in Information Technology - Specialization: Computer Systems & Network Engineering
Sri Lanka Institute of Information Technology (SLIIT) - Malabe,Sri Lanka

Mo/Thanamalvila National School

H/Debarawewa president college

SKILLS

- IP Addressing
- VLAN Configuration
- Network Troubleshooting
- Routing & Switching
- Cisco Packet Tracer
- Subnetting

CERTIFICATES

Getting Started with Cisco Packet Tracer
Cisco Networking Academy (Credential ID: cfc004b9-3514-4f73-9e52-963836f3859b)

CCNA
Currently Pursuing

AWS Training & Certification – AWS Networking Basics

Oracle – Oracle Cloud Business Jumpstart

Web Design for Beginners
University of Moratuwa (Credential ID: LSHBuLZp0P)

Cisco Networking Academy – Introduction to IoT and Digital Transformation

Microsoft Learn – Describe Cloud Computing

PROJECTS

Enterprise Network Infrastructure Design | Cisco Packet Tracer
• Designed and implemented a secure enterprise network for a two-floor office supporting 50 users.
• Configured VLANs for Staff, Admin, Guest, and Management departments.
• Implemented Inter-VLAN Routing using Cisco Router 2911.
• Configured DHCP and DNS services for automatic IP assignment and name resolution.
• Secured the network using Port Security, SSH, WPA2-PSK, and Access Control Lists (ACLs).
• Implemented SNMP, SYSLOG, TFTP, and NTP for network monitoring, logging, and configuration backup.
• Tested end-to-end connectivity and network performance using Cisco Packet Tracer.

Arduino-Based Smart Home Automation System
Technologies: Arduino Uno, C/C++, Sensors, Relay Module, IoT, Embedded Systems
- Designed and developed a smart home automation system using an Arduino microcontroller.
- Integrated sensors and relay modules to automate the control of household electrical appliances.
- Programmed the system using Arduino IDE (Embedded C/C++).
- Implemented automated monitoring and control of connected devices.
- Tested hardware integration, sensor communication, and system reliability.
